

TFID-150

Fiber Optic Analogue Panel Network Card

Description

The TFID-150 network card lets you connect any analogue control panel to DETNOV's fire detection network.

The DETNOV's network can be a bus or a ring with a maximum of 32 nodes; the distance between nodes can reach up to 1 Km to make a 32 Km networked system.

Features

- Fiber Optic network output
- Multi-mode Fiber Optic
- ST connectors Fiber Optic

Technical features

Network features	
Maximum nodes in the network:	32
Maximum distance between nodes:	1 Km
Maximum network coverage:	32 Km
Operating mode:	Peer to Peer
Connections	
2 x ST connectors Fiber Optic	
Environment	
Operating temperature: From -5°C to +40°C	
Relative humidity: 95% without condensation
