

# TRD-100

## 4 Free Contact Relay Output Expansion Card

### Description

The TRD-100 card has been designed to increase the number of relay outputs to DETNOV's CCD-100 range of conventional fire control panels. The TRD-100 card provides four free contact relay outputs with their three corresponding contacts (common, normally opened, normally closed), which may be used to carry out activations by zone in a conventional system. CCD-100 fire control panels are able to host up to three TRD-100 cards, obtaining a total of 12 additional relay outputs.

### Features

- 4 relay outputs
- Up to 3 cards per control panel

### Technical features

Relays	
	Maximum load: 10A to 30VCC
	Delay: From 0 to 10 minutes built in panel board
Environment	
	Operating temperature: From -5°C to +40°C
	Relative humidity: 95% without condensation
