

TRED-150

Analogue Panel Network Card

Description

The TRED-150 network card lets you connect any analogue control panel to DETNOV's fire detection network. The card also has a RS232 port to connect a serial printer to the panel.

The DETNOV's network can be a bus or a ring with a maximum of 32 nodes; the distance between nodes can reach up to 1 Km to make a 32 Km networked system.

Features

- RS485 network output
- RS232 printer output

Technical features

Network features	
Maximum nodes in the network:	32
Maximum distance between nodes:	1 Km
Maximum network coverage:	32 Km
Operating mode:	Peer to Peer
Connections	
	2 x 1.5 mm ² twisted and shielded cable
Environment	
	Operating temperature: From -5°C to +40°C
	Relative humidity: 95% without condensation
