

TRD-100

Expansion card of 4 free voltage relay outputs

Description

The TRD-100 expansion card has been designed to increase the number of relay outputs of Detnov's CCD-100 range of conventional fire control panels.

The TRD-100 card provides 4 free contact relay outputs with their three corresponding contacts (common, normally opened, normally closed), which may be used to carry out activations by zone in a conventional system.

CCD-100 fire control panels are able to host up to 3 TRD-100 expansion cards, obtaining a total of 12 additional relay outputs.

Programmable via SWD-100 software.

Technical features

Relay outputs		
Maximum load:		10A to 30VCC
Delay selectable on panel board:		0-10 minutes
Environment		
Operating temperature:		From -5°C to +40°C
Relative humidity:		95% without condensation
